

Day - 23

## PROFIT AND LOSS

→ Profit and Loss (S.P./C.P./Profit/Loss)  
→ Discount (Mark Price MRP) (Discount)

Important Formula:

$$1) \text{ Profit} = \text{S.P} - \text{C.P} \quad 1) \text{ Loss} = \text{C.P} - \text{S.P}$$

$$2) \text{ Profit \%} = \frac{\text{S.P} - \text{C.P}}{\text{C.P}} \times 100 \quad 2) \text{ Loss} = \frac{\text{C.P} - \text{S.P}}{\text{C.P}} \times 100$$

$$\text{Profit} = \left( \frac{\text{S.P}}{\text{C.P}} - \frac{\text{C.P}}{\text{C.P}} \right) \times 100$$

$$\frac{\text{Profit}}{100} = \frac{\text{S.P}}{\text{C.P}} - 1$$

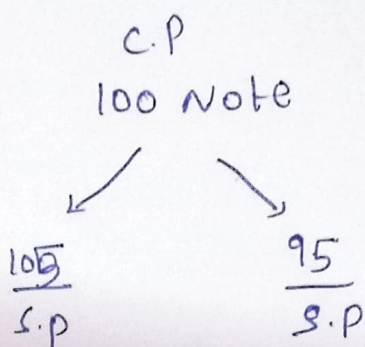

$$\frac{\text{Profit}}{100} + 1 = \frac{\text{S.P}}{\text{C.P}}$$

$$\frac{\text{Profit} + 100}{100} = \frac{\text{S.P}}{\text{C.P}}$$

$$3) \frac{\text{Profit} + 100}{100} = \frac{\text{S.P}}{\text{C.P}}$$

$$3) \frac{\text{Loss} - 100}{100} = \frac{\text{S.P}}{\text{C.P}}$$

Ex:

$$\text{Profit} = \text{S.P} - \text{C.P}$$

$$= 105 - 100$$

$$\boxed{\text{Profit} = 5}$$

$$\text{Loss} = \text{C.P} - \text{S.P}$$

$$= 100 - 95$$

$$\boxed{\text{Loss} = 5}$$

Note  
Profit / Gain
